MEMORANDUM FOR: Deputy Director for Policy and Management

25X1A FROM:

[REDACTED]  
Deputy Director for Community Affairs

SUBJECT: Resource Requirements for [REDACTED] Implementation 25X1A

REFERENCE: Memo for NFIB from D/DCI/RM, Same Subject, dated  
8 September 1980 (NFIB-9.10/12)

25X1A

1. In the referenced memorandum, copy attached, [REDACTED] points out that while the DCI has decided that [REDACTED] funding requirements will be ranked within the minimum NFIP Guidance level, no adjustments to guidance has been provided to accommodate this initiative. He asks for review of needs for additional resources to put [REDACTED] into effect. He wants decision packages reflecting these needs by 15 October. He urges use of existing SCI resources to implement [REDACTED] 25X1A

2. In the final report of the Compartmentation Study, there was a section on estimated [REDACTED] resource needs including those for countermeasures in the industrial sphere. CIA personnel needs were detailed at [REDACTED] additional positions. Inadvertently omitted was additional equipment costs.

3. The OS decision packages should be reviewed to assure that these resource needs were incorporated in our minimum package. If not, [REDACTED]'s invitation to submit a decision package might be considered.

4. In this regard, I have consulted with C/SSC and learned that they don't need additional resources for either the 4C program or CIB activities at this time.

5. You might check with TSD.

MEMORANDUM FOR NATIONAL FOREIGN INTELLIGENCE BOARD

SUBJECT : Resource Requirements for [ ] Implementation

25X1A

25X1A 1. There are indications from the Intelligence Community that implementation of the [ ] Special Access Control System will have resource implications which could be quite substantial. The [ ] System requirements for document control and, to a lesser degree, sanitization, have been cited as requiring extensive amounts of manpower and money. In addition, resources will be required for decompartmentation and the conversion, over time, of computer and communication systems. [ ] 25X1A

25X1A 2. The DCI has decided that [ ] funding requirements will be ranked within the minimum NFIP Guidance level. However, no adjustment to guidance has been provided to accommodate this initiative. Therefore, please review once again, as carefully as possible, your anticipated needs for additional resources to put [ ] into effect. Decision packages to reflect these resources are to be submitted to the D/DCI/RM by 15 October 1980. The procedures for document control are prescribed in the [ ] Manuals for Government and Industry. Sanitization and decompartmentation procedures will be forthcoming from COMIREX and the SIGINT Committee, but probably will not be available before budget submissions are due. Both committees will provide as much guidance as possible regarding anticipated procedures. The document control and accountability features of the [ ] System are essential to the 25X1A Presidentially directed effort to enhance the protection of highly sensitive intelligence programs. To the extent practicable, you are urged to utilize existing resources devoted to the security of classified and Sensitive Compartmented Information (SCI) to implement [ ] (C) 25X1A
